WORK EXPERIENCE

QA TESTER NO COUNTRY - INTERNSHIP CONTRACT July 2024- August 2024

Third job simulation, where I worked as a QA, within a multidisciplinary team. And as a TEAM LEADER of another team. This experience has been fundamental to strengthen and demonstrate my capabilities and skills, both technical and soft.

Project: Mercado Chamba - Web application for hiring professionals. And in turn, it allows service providers to advertise them.

Project Responsibilities: Selection of work tools, such as Trello and Figma for project management. Creation of user stories and their acceptance criteria. Preparation of the corresponding test plan. Test case design. Execution of test cases manually. Endpoint testing (backend) with Swagger and Postman. Report of the issues found. Organization of daily meetings, planning activities, presentation of each sprint and final presentation of the application.

QA TESTER NO COUNTRY - INTERNSHIP CONTRACT May 2024- June 2024

Second work simulation for 5 weeks, where I worked as a QA, within a multidisciplinary team. And as team leader of two other teams. This experience has been fundamental to strengthen and demonstrate my capabilities and skills, both technical and soft.

Project: No PlayOff - Responsive web application for the management of sports tournaments.

Project responsibilities: Selection of work tools, such as JetBrains and Figma for project management. Creation of user stories and their acceptance criteria. Preparation of the corresponding test plan. Test case design. Execution of test cases manually. Endpoints testing (backend) with Swagger. Report of the issues found. Organization of daily meetings, planning activities, presentation of each sprint and final presentation of the application. Constant contribution and exchange of ideas in the Daily Meet from week 0, communication with each team member and with Team Leader.

QA TESTER NO COUNTRY - INTERNSHIP CONTRACT March 2024- April 2024

First job simulation for 5 weeks, where I worked as a QA, within a multidisciplinary team. This experience has been fundamental to strengthen and demonstrate my capabilities and skills, both technical and soft.

Project: RODAR - Web and mobile application for purchasing bus tickets

Responsibilities in the project: Selection of work tools, such as Trello for project management. Creation of user stories, preparation of the requirements document and its acceptance criteria. Test case design. Execution of test cases manually. Endpoints testing (backend) with Postman. Report of the issues found. Organization of daily meetings, planning activities, presentation of each sprint and final presentation of the application. Constant contribution and exchange of ideas in the Daily Meet from week 0, communication with each team member and with Team Leader.

WORK EXPERIENCE

DESIGN, DEVELOP AND TEST OF WEB APPLICATION. Freelance

2014- Present

I work on freelance projects. With a work team, doing the design, development and testing of responsive applications, with different technology STACKs, which adapt to each particular project. My main activities are requirements analysis, development of user stories, development of test cases. Execution of test cases in backend and frontend. Reports. Documentation. All this within an agile methodology.

QA ENGINEER Belatrix Software Factory

2011- 2013

I worked with a quality team, testing a web application for a client in the United States. Developing test cases, executing and reporting through Jira.
